SO, WHAT IS DIANTHUS?

Dianthus has been the main character for over 2,000 years. Native to the Mediterranean and Asia Minor, this flower was already a favorite: used in medicine, decoration, and even ceremonies— they used it for everything! With its unique beauty and enchanting fragrance, it has always known how to steal the show.

Today, Colombia is its new playground, thanks to its high demand and ability to adapt to any climate. And since we know you have great taste, we'd love to see you at the next Dianthus Week! If you're interested, keep reading; there's so much more to share.
